Statutory auditors report on the annual financial statements

Year ended December 31, 2018

To the General Meeting of Ceetrus S.A.,

Opinion

In execution of the mission entrusted to us by your General Meeting, we have audited the annual financial statements of the company Ceetrus S.A. for the financial year ended December 31, 2018, as attached to this report.

We certify that, in the light of French accounting rules and principles, the annual financial statements are sincerely and honestly presented and give a true and fair view of the results of the operations of the past financial year and the financial position and assets of the company at the end of this financial year.

Basis of opinion

Audit reference system

We conducted our audit in accordance with professional standards applicable in France. We believe that the evidence we have collected is sufficient and appropriate to provide a basis for our opinion.

The responsibilities incumbent on us with regard to these standards are set out in the section "Auditors' responsibilities for auditing the annual financial statements" of this report.

Independence

We carried out our audit mission in accordance with the independence rules applicable to us, over the period from January 1, 2018 to the date of issuance of our report, and in particular we have not provided services prohibited by the code of ethics of the profession of auditor.

Justification of the assessments

Pursuant to the provisions of Articles L. 823-9 and R. 823-7 of the French Commercial Code relating to the justification of our assessments, we inform you that the most important assessments that we have made, in our professional judgement, related to the appropriateness of the accounting principles applied and the reasonableness of the significant estimates used and the overall presentation of the accounts, particularly as regards the equity investments.

The assessments thus made fall within the context of the audit of the annual financial statements taken as a whole and the formation of our opinion expressed above. We do not express an opinion on elements in these annual financial statements taken separately.

Equity investments, whose net amount on the balance sheet on December 31, 2018 amounted to €3,298,148,000, are recorded at their transfer, subscription or acquisition value and impaired as described in note 2.3. "Controlling interests and other financial assets" in the appendix.

On the basis of the information provided to us, our work consisted of assessing the appropriateness of the methods used and the data on which the determination of the value in use of the controlling interests is based, notably to assess the consistency of the assumptions made by general management.

Specific verifications

In accordance with the professional standards applicable in France, we have also carried out the specific verifications required by the legal and regulatory texts.

Information provided in the management report and in other documents related to the financial situation and the annual financial statements addressed to the shareholders

We have no matters to report as to the fair presentation and the consistency with the financial statements of the information given in the management report of the Board of Directors and in the other documents pertaining to the financial situation and the annual financial statements addressed to the shareholders.

We certify the fairness and consistency with the financial statements of the information relating to the payment periods referred to in Article D.441-4 of the French commercial code.

Corporate governance information

We certify the existence, in the section of the management report of the Board of Directors devoted to corporate governance, of the information required by Article L.225-37-4 of the French Commercial Code.

In application of the law, we inform you that the information provided for by the provisions of article L.225-37-3 of the French Commercial Code is not mentioned in the section of the management report of the Board of Directors devoted to corporate governance. Consequently, we can not attest to the existence in this report of the information required nor of the accuracy and the sincerity of the information relating to the remunerations and benefits paid to the corporate officers as well as on the commitments made in their favour.

Responsibilities of the management and persons in charge of corporate governance relating to the annual financial statements

It is the responsibility of management to prepare annual financial statements that present a true and fair view in accordance with French accounting principles as well as to implement the internal control that it deems necessary for the preparation of annual financial statements that do not include any significant misstatements, whether due to fraud or error.

In preparing the annual financial statements, management is responsible for evaluating the Company's ability to continue as a going concern, to present in these accounts, as appropriate, the necessary information relating to the continuity of operations and apply the going concern accounting policy unless it is intended to liquidate the company or cease trading.

The annual financial statements have been approved by the Board of Directors.

Responsibilities of the statutory auditors in the auditing of the annual financial statements

It is our responsibility to prepare a report on the annual financial statements. Our objective is to obtain reasonable assurance that the annual financial statements taken as a whole do not contain significant misstatements. Reasonable assurance is a high level of assurance, but it does not guarantee that an audit carried out in accordance with professional standards will systematically detect any significant misstatement. Anomalies may arise from fraud or error and are considered significant where it can reasonably be expected that they, taken individually or in combination, may influence the economic decisions that users of the accounts take in their business based on these.

As specified by Article L.823-10-1 of the French Commercial Code, our assignment to certify the accounts does not consist of guaranteeing the viability or the quality of the management of your company.

As part of an audit carried out in accordance with the professional standards applicable in France, the statutory auditor exercises their professional judgement throughout this audit. Furthermore:

- they identify and assess the risks that the annual financial statements contain significant misstatements, whether due to fraud or error, define and implement audit procedures to address these risks, and collect any elements they consider sufficient and appropriate on which to base their opinion. The risk of not detecting a significant anomaly from fraud is higher than that of a significant misstatement resulting from an error, as the fraud may involve collusion, forgery, voluntary omissions, misrepresentation or circumventing internal controls;
- they become acquainted with the internal control relevant to the audit in order to define appropriate audit procedures in the circumstances, and not to express an opinion on the effectiveness of the internal control;
- they assess the appropriateness of the accounting methods used and the reasonableness of accounting estimates made by management, as well as the information relating to these provided in the annual financial statements;

- they assess the appropriateness of management's application of the going concern accounting policy and, depending on the evidence gathered, the existence or otherwise of significant uncertainty related to events or circumstances likely to call into question the company's ability to continue as a going concern. This assessment is based on the information collected up to the date of their report, although it should be remembered that subsequent circumstances or events could jeopardize the continuity of operations. If they conclude that there is significant uncertainty, they draw the attention of the readers of their report to the information provided in the annual financial statements about this uncertainty or, if this information is not provided or is not relevant, they formulate a certification with reserves or a refusal to certify;
- they assess the overall presentation of the annual financial statements and assess whether the annual financial statements reflect the underlying transactions and events so as to give a true and fair view of them.

NOTES TO THE ANNUAL ACCOUNTS

Company: CEETRUS

The financial year has a duration of 12 months covering the period from 01/01/2018 to 12/31/2018

The notes or tables hereafter form an integral part of the annual accounts.

1. Key factors

1.1. Main events of the financial year

Immochan SA changed its company name on July 1st, 2018 to Ceetrus SA.

In 2018, Ceetrus SA received dividends in the amount of €121,267,756 from Ceetrus France and €134,980 from the limited liability company Domaine de Bonne Nouvelle.

Ceetrus SA has subscribed to a €500 million loan maturing in 2023 from five banks grouped together under a "Club Deal", a €60 million bond issue maturing in 2025 and subscribed to €855 million in credit lines with Auchan Holding maturing in 2020.

It also granted a €494.8 million loan to its subsidiary Ceetrus Finances in July 2018, maturing in 2023.

Shares in the company Aushopping, which is 100% owned by Ceetrus SA, have been fully impaired. Additional impairment was allocated over the year in proportion to the capital increase of the subsidiary.

1.2. Events subsequent to the end of year

On January 19th, 2019, Ceetrus concluded a €50 million financing agreement maturing in 2021.

2. Accounting rules and methods

The annual accounts have been prepared and presented in accordance with the principles and methods defined by ANC regulation no. 2014-03 of 5 June 2014 relating to the French accounting principles [PCG].

The general accounting conventions have been applied in accordance with the principle of prudence, in accordance with the basic assumptions:

- continuity of operations,
- consistency of accounting methods from one year to the next,
- independence of financial years,

and in accordance with the general rules for the preparation and presentation of the annual accounts.

The basic method used for valuing items recorded in the accounts is the historical cost method.

2.1. Intangible assets

Software

Computer software purchased and software developed internally are capitalised and depreciated over their estimated useful life of 3 years. As an exception, ERP-type software is depreciated over 5 years since it is highly structuring for the business and its functional and technical architecture has a longer useful life.

Impairment of intangible assets:

In accordance with article 214-16 of the PCG, the company carries out impairment tests as soon as there is an indication of loss of value. When the net book value of the asset exceeds its recoverable amount, an impairment loss is recorded as an expense.

2.2. Tangible assets

Tangible assets are valued at their acquisition cost, with the exception of assets received as an asset contribution on January 1st, 1997.

Acquisition costs and borrowing costs are recorded as expenses.

The principal components of a tangible asset (hereinafter "component") are recorded separately when their estimated useful lives are significantly different. A depreciation plan specific to each component is applied according to the rate or method of depreciation specific to it.

Maintenance and repair costs are recorded in the period in which they are incurred. Subsequent expenditures related to the replacement or renewal of a component are accounted for as a separate asset replacing the renewed asset.

Fixed assets are depreciated from the date of commissioning of the asset over their useful life with a residual value of zero.

Constructions (structural work):	40 years
Roofing, sanitation and flooring:	20 years
Fixtures and fittings:	6 and 2/3 years to 8 years
Technical installations, equipment and tools:	3 to 8 years
Office supplies:	3 to 5 years
Other fixed assets:	3 to 5 years

When the depreciable asset is likely to be eligible for tax system using declining-balance depreciation method and/or when the periods of use in the profession are lower than the useful lives, the company records an excess tax depreciation.

Impairment of tangible assets:

The impairment rules for tangible assets are identical to those used for intangible assets.

2.3. Controlling interests and other financial assets

Equity investments are shown on the balance sheet at their transfer value. When the inventory value of a controlling interest is lower than its transfer or acquisition value, a provision for impairment is established.

The inventory value of a controlling interest corresponds to its value in use for the company, which is determined by reference to the proportion of shareholders' equity held, to the corrected net accounting asset, to its yield value and to the prospects of profitability.

Acquisition costs are included in the cost price of equity investments and are depreciated over a 5-year period.

Other financial assets are shown on the balance sheet at their production cost. If necessary, provisions are recognised when their value in use falls below their cost.

2.4. Receivables and debts

Receivables and debts are valued at their par value. Those expressed in foreign currencies are valued on the basis of the exchange rate prevailing at the end of the financial year.

Borrowing costs are spread over the term of the loan.

When commercial transactions are hedged to fix the price of the foreign currency, debts and receivables are recorded at the hedged rate. In this case, there is no conversion difference.

Receivables with risks of non-payment are subject to depreciation by provision.

2.5. Negotiable securities

Negotiable securities have been valued at their purchase price or their market value at the end of the financial year, whichever is lower.

2.6. Provisions for risks and expenses

A provision for risks and expenses is recorded when the company has a legal or constructive obligation to a third party resulting from a past event, the amount of which can be estimated in a sufficiently reliable manner and whose termination is likely to result in an outflow of resources.

2.7. Pension commitments and other long-term employee benefits

The company outsources the management of end-of-career benefits to cover future expenses through an insurance system.

The commitments are subject to an actuarial valuation, using the projected credit unit method. This method consists of determining the rights acquired by the employees at the end of year for pensions, post-employment benefits and long-term benefits, taking into account the economic conditions and the forecasts for salary changes.

As such, the valuation of retirement benefits takes into account, in particular, the following data:

- end-of-career salaries by integrating the years of service of the employees, the projected salary level at the date of retirement, taking into account expected career growth effects and an estimated evolution of pension levels;
- the retirement age, determined according to the provisions applicable in the company;

- the projected number of employees retiring, determined on the basis of turnover rates and the mortality table TF00/02 with age difference;
- a nominal discount rate of 1.8%;
- a rate of return on financial assets of 1.8%.

Ceetrus SA does not make any provision in its accounts for retirement benefits.

2.8. Notion of current profit/loss and exceptional profit/loss

All exceptional elements in terms of frequency and amount related to ordinary activities are recorded as exceptional profit/loss.

2.9. Taxes on profits

The company is consolidated for tax purposes. The parent company (Auchan Holding SA), as the only entity liable for the tax, records the tax debt owed to the Public Treasury. Subsidiaries in the tax consolidation group determine and account for their tax expenses as if they were taxed separately and record their tax liability to the parent company in the current accounts. Tax savings from loss-making companies are recorded in the income statement by the group's tax consolidation parent company (Auchan Holding SA)

3.Changes in method

During the financial year, no change in method occurred; consequently, the exercises are comparable without restatement.

4. Notes on the balance sheet

4.1. Fixed assets

4.1.1. Intangible and tangible assets

Gross fixed assets (in thousands of euros)	Start of the financial year	Merger operation	Increase and contributions	Decrease and contributions	End of the financial year
